PROJECTS EXPERIENCE:

Project Title: MERN- School-Management   Oct 2021

Description: MERN is the acronym for MongoDB, Express.js, React.js, and Node.js combination of JavaScript-based technologies which are used to build advanced web applications**.**

Role: Design, Development, Testing and Review
Responsibilities:

- Requirement's analysis and overall functionality design
- Defined Mongoose schemas & implemented express routers to get, post entries from Mongoose database cloud platform.
- Implemented React components based out of Material UI
- Implemented react hooks to handle component functionalities and state changes
- Code review, ReadMe generation, git and Heroku & Netlify deployment of project

Tools/Language Used: JavaScript, NodeJS, ReactJS, Material UI, MongoDB, Express, GitHub, Heroku, Netlify

Link to GitHub: https://github.com/sujatha-m/MERN-school-management

Live Project: https://mernstack-school-management-app.netlify.app/

Project Title: U-break-We-Fix   July 2020
Description: U break we fix is a MERN based home improvement services application.
Role: Design, Development, Testing and Review
Responsibilities:

- Requirement's analysis and overall functionality design
- Defined Mongoose schemas & implemented express routers to get, post entries from Mongoose database
- Implemented authentication of the app using JWT
- Implemented React components based out of Material UI
- Implemented react hooks to handle component functionalities and state changes
- Code review, ReadMe generation, git and Heroku deployment of project

Tools/Language Used: JavaScript, NodeJS, ReactJS, Mongo DB, Mongoose, Express, Material UI, JSON Web Token(JWT), bcryptjs, GitHub, Heroku

Live Project: https://still-depths-30514.herokuapp.com/

Project Title: Natours   Dec 2020 – Jan 2021
Description: The main goal of this project is to demonstrate HTML, CSS and SASS knowledge. Built with advanced CSS techniques using the floats-based layout.
Role: Design, Development, Testing and Review
Responsibilities:

- Requirement's analysis and design
- Overall implementation built with advanced CSS techniques using the floats-based layout.
- Responsive Design

Tools/Language Used: HTML5, CSS3, SAAS, BEM, NPM, GitHub.

Link to GitHub: https://github.com/sujatha-m/Natours

Live Project: https://sujatha-m.github.io/Natours/index

Project Title: Employee Directory   Feb 2020 – Mar 2020
Description: An Employee Directory application built using React components. The application manages component states and responds to user events.
Role: Design, Development, Testing and Review
Responsibilities:

- Requirement's analysis and design
- Implemented front end framework using React
- Implemented Sort and Filter features by utilizing Randomuser APIs
- Code review, git deployment

Tools/Language used: React.js, React-dom, React-bootstrap, Axios, NodeJS, Randomuser API, GitHub

Link to GitHub: https://github.com/sujatha-m/react-employee-directory

Live Project: https://sujatha-m.github.io/react-employee-directory/

EDUCATION:

- **Xtreme Talent Accelerator program (XTAP) in React.js** Nov 2020 – Jan 2022
  Light House Labs, Ottawa, ON

- **Bootcamp Certificate in Full-Stack Web Development**
  Carleton University, Ottawa, ON Feb 2020 – July 2020
  Grade: A+

- **Bachelor of Arts (History, Economics, Political Science) – SK University, India** Jun 2002 - April 2005
